CONSENT FORM TO PARTICIPATE IN A NON-BIOMEDICAL RESEARCH - MOTHER AND CHILD HEALTH SURVEY IN HEALTH FACILITIES IN INDONESIA

Introduction

My name is _____. We are doing a study called the Transparency for Development project with researchers from Harvard University, Results for Development Institute, and University of Washington in the United States.

What is the purpose of this research?

The purpose of this research is to learn about maternal and under-2 child health in the communities served by this health facility. The survey covers infrastructure, equipment, drugs, human resources, consultations, and financial information. We would be very grateful if you would provide us with the relevant information or point us to your colleagues who are responsible for these activities.

The questions usually take about 2 hours. Your health facility was selected to be part of this study and the information you provide may be shared with members of your community.

Participation is voluntary

You don't have to respond to the survey, but we hope you will agree to answer the questions since your views and the experience of this facility are important.

If I ask you any question you don't want to answer, just let me know and I will go on to the next question or you can stop the interview at any time. Refusal to participate or stopping your participation will involve no penalty to you or this facility.

Confidentiality and Risks

We will take measures to keep all personal information collected confidential. Although we may ask the names of respondents, we will remove your name from the answers and give it a code, but there is a chance that someone could find out your information. We will take every precaution to prevent this from happening, and your name will not be listed in any report that comes out of the survey.

Risks

We do not anticipate that this study exposes you to any physical or psychological risks other than those you may encounter in everyday life.

Compensation

Are there any benefits from being in this research study?

There are no direct benefits to you from taking part in this research. However, the results of this study may be used to help to improve maternal and child health in the communities this facility serves.

Questions or Concerns

If you have questions, concerns or complaints, the survey director for this study is Ni Wayan Suriastini who can be reached at (0274) 4477464, Survey Meter, Jln. Jenengan Raya No. 109, Desa Maguwoharjo, Kecamatan Depok, Kabupaten Sleman, D.I. Yogyakarta.

Do you give consent to participate in this study? 1. Yes 3. No

FACILITY ID

CONSENT FORM TO PARTICIPATE IN A NON-BIOMEDICAL RESEARCH - MOTHER AND CHILD HEALTH SURVEY IN HEALTH FACILITIES IN INDONESIA

Introduction

My name is _____. We are doing a study called the Transparency for Development project with researchers from Harvard University, Results for Development Institute, and University of Washington in the United States.

What is the purpose of this research?

The purpose of this research is to learn about maternal and under-2 child health in the communities served by this health facility. The survey covers infrastructure, equipment, drugs, human resources, consultations, and financial information. We would be very grateful if you would provide us with the relevant information or point us to your colleagues who are responsible for these activities. The questions usually take about 2 hours. Your health facility was selected to be part of this study and the information you provide may be shared with members of your community.

Participation is voluntary

You don't have to respond to the survey, but we hope you will agree to answer the questions since your views and the experience of this facility are important.

If I ask you any question you don't want to answer, just let me know and I will go on to the next question or you can stop the interview at any time. Refusal to participate or stopping your participation will involve no penalty to you or this facility.

Confidentiality and Risks

We will take measures to keep all personal information collected confidential. Although we may ask the names of respondents, we will remove your name from the answers and give it a code, but there is a chance that someone could find out your information. We will take every precaution to prevent this from happening, and your name will not be listed in any report that comes out of the survey.

Risks

We do not anticipate that this study exposes you to any physical or psychological risks other than those you may encounter in everyday life.

Compensation

Are there any benefits from being in this research study?

There are no direct benefits to you from taking part in this research. However, the results of this study may be used to help to improve maternal and child health in the communities this facility serves.

Questions or Concerns

If you have questions, concerns or complaints, the survey director for this study is Ni Wayan Suriastini who can be reached at (0274) 4477464, Survey Meter, Jln. Jenengan Raya No. 109, Desa Maguwoharjo, Kecamatan Depok, Kabupaten Sleman, D.I. Yogyakarta.
